

# Group 1 - Sprint 6 review report

(Samuel Sarimo, Niko Mehiläinen, Auri Laitinen)

## Done tasks during this sprint:

- Create UML diagrams: Use case diagram of the software, activity diagram for posting, class diagram for software domain.
- DB localization for posts.
- Statistical code review using SonarQube, SpotBugs and PMD; written report on GitHub.
- Refactoring and bugfixing: clarifying method names and code, assure Logger use, removal of hard-coded strings, removing unnecessary comments.
- Update ER chart and relational schema diagram to match current DB structure.

## What is in progress:

- Acceptance test design.

## Obstacles we faced:

- No obstacles.
